

Pino Trogu

Teacher's Introduction — Recorded January 25, 2021

<https://www.youtube.com/watch?v=fOKwHI8qfC0>

Video description with time stamps. Compiled 2021-08-22; revised 2022-01-21

Update 2022-01-21: modified a few notes below as the class is DES 320 in Spring 2022, not DES 220. Also, class modality started online but planned to move in-person in mid-February.

Update 2021-08-22: added timestamps below for a few corrections related to recent changes in the class structure and assignments.

Note: if watching on computer, watch at as high a resolution (HD up to 1440) as your connection allows.

8:10 the discussion about buying a different set of tools for more complex or simpler drawings does not apply anymore starting in Fall 2021. See link below for list of required tools (compass is required.)

11:27 there is no optional wooden letter drawing this semester, but you are welcome to watch video in the playlist and sketch the letters on your own.

12:39 the compass is again required starting with the Fall 2021 semester.

13:15 the clothespin technical drawings, orthographic and isometric, with tools, are actually optional (Fall 2021 & Spring 2022). These are different from the required clothespin/tape dispenser/lightbulb freehand drawing.

15:02 the 2-point perspective tutorial (the horseshoe shape) is the same for everyone.

15:27 the last color perspective drawing is in fact optional.

16:49 get 9x12 paper pads (sketching, drawing, and tracing paper) as soon as possible. Use letter size (8.5x11) in the meantime.

20:10 in Fall 2021 the class is bichronous, meeting once a week on zoom. In Spring 2022 the class is hybrid, meeting once a week in-person (although delayed until Feb. 14).

The video is about my art school background; I show a catalog of projects from my high school. The video shows also some of my drawings and sketches and also drawings from a student's portfolio.

You can also download a PDF with a visual reference for each tool, a description, and links to online sources for each item:
