Simplicity Refracted

Inspired from the rare phenomenon of the iridescent rainbow cloud, this light diffuser portrays a simple dome-shaped silhouette, while the inside adds an alluring depth and dimension.

Composed of 13 laser cut acrylic shapes, this light diffuser includes an iridescent, light blue and frosted white. The pieces that were bonded together include 96 laser cut acrylic spacers to add more depth in between each layer, and rotated to a certain degree to give an abstract internal pattern, as clouds are never one shape. The star shape was chosen to give the contrasting idea of night and day, where the light can represent the sun or moon and rather than clouds in the sky during the day, stars are casted in the night.

Tiana Casanova

Keywords: whimsical, comforting, enchanting, immersive, calm, tranquil, serene, peaceful, solitude

Materials: clear and frosted plastic, warm light contrasting with cool colors

Concept: A light diffuser that emits a cool blue and green scene and makes you feel calm and peaceful and alive. A symbolic meaning behind the color blue is serenity and green being freshness and life which I think is fitting for the keywords.
