

## 02.1 Patterns - 11x17 Presentation handout - One-page proposal

Note: this assignment is due by end of day, Saturday, Sept. 19, 2016

DAI523 Info Design: Data Visualization | Trogu | SFSU

### Upload a single PDF file

Prepare a one-page written proposal where you outline your topic and the story you want to tell with your visualization for [Assignment 2](#). Include links to websites and links to data sets as appropriate. Include these links in the PDF version of the proposal so that they are clickable and can be accessed quickly.

You can also consult this [list of topics from The New York Times](#) before you decide on your final topic. The hard copy articles (those with a post-it and a number) are available for viewing in Room 153, in a large scrapbook or in the flat files. Please contact Prof. Trogu if you need access to the scrap books outside of class time. If you borrow an article, please leave a page with your name and the article title on it so that we know who has it.

You can view sample final designs from the 2012 class in the [archive folder](#), or look at a few that I have selected that are particularly good. I have assembled those in this [reference folder](#).

Upload written proposal by the start of class today.
